

*To whom it may concern,*

*As the coordinator of the PhD programme in biophysics, Faculty of Science, University of Split, I can confirm that that all doctoral students from our programme, who fully participated in the OMICs in biomedical research conference 2015 at MedILS in Split in period June 8-12, will earn 5 ECTS from their study programme. Education of doctoral students is one of goals of that conference and our programme does anticipate for doctoral students of first or second year study the participation in one summer school or conference dealing with topics from biophysics.*

*Davor Juretić*

*Scientific coordinator of the PhD programme in biophysics, Faculty of Science, University of Split*
